MEDIA RELEASE

EBG Capital successfully led Swiss investor group to purchase Australian dairy property

EBG Capital led a group of investors purchasing Blumont Dairy in Tasmania, Australia. Blumont is a 500 ha dairy farm of which 85 ha are currently irrigated. The property is in Scottsdale, a 45 min drive from Launceston. It profits from very fertile and well drained soils and 1'000mm annual precipitation.

With its existing 40 unit rotary dairy, the farm can milk up to 400 cows. However, the new owners plan to replace it by a more efficient milking system as well as expand the irrigation infrastructure. This would increase the milking capacity to 900+ cows and the irrigated area to around 135 ha from year two. Blumont farm has a strong track record and produces high-quality milk supplied to Tasmanian dairy processors. Bringing this farm under the wings of other dairy farms managed by EBG Capital will increase economies of scale and thus profitability of all Swiss dairies in Tasmania.

The investor's consortium involves Swiss and local Australian investors and a local partner in Australia that will be responsible for the management of the farm. Together with the other dairy investment club deals we advised on, the farms are now producing about 5% of Tasmania's milk.

EBG Capital AG

EBG Capital AG is an agricultural investment advisory boutique with global reach and proven track record. We are providing specialist advice and access to attractive investment opportunities.

Our clients include single family offices, wealth managers, institutional investors and international organizations.
