

29th July 2015

Press Release

**EBG Capital conducts series of training and awareness raising events
on responsible agriculture investments**

On behalf of the Swiss Government, EBG Capital will convene a number of training sessions to raise the awareness and understanding of the private sector regarding responsible agricultural investment guidelines and standards. A particular focus will be placed on the launch of the so-called CFS-RAI principles, which were adopted in October last year by the UN Committee on Food Security in Rome. The CFS-RAI are the most comprehensive guidelines in this sector to cover investments along the agricultural value chain.

The objective of these events is to provide sector-specific information (for banking, asset management, commodity traders and the food industry) about existing standards and guidelines, why these are relevant for their sectors and how the guidelines should be implemented in practice.

In order to reach out to these specific target groups, EBG Capital has teamed up with the following organisations, which will host the respective events:

- Commodity Club Switzerland: <http://www.commodityclub.ch>
- Swiss Trading and Shipping Association: <http://www.stsaswiss.ch>
- Swiss Sustainable Finance: <http://www.sustainablefinance.ch>
- Zug Commodity Association: <http://www.zugcommodity.ch>
- World Economic Forum / Grow Africa Initiative: <http://www.weforum.org/>
<http://www.growafrica.com>
