MEDIA RELEASE

EBG offsets Carbon Footprint for 2019-2024

Excellent local partners in EBG's focus investment regions are key to our success. Thus, periodical visits to overseas are necessary to sustain long-term business relationships.

EBG compensates for its carbon emissions from travel by financing the «Gold Standard» climate protection project «Geres Wind Farm» in Turkey. While focusing on reducing greenhouse gas emissions, this project also generates multiple co-benefits (e.g. job creation, improvement of air quality, stabilize electricity prices) and is supportive of the United Nations Sustainable Development Goals.

The Gold Standard is an award-winning certification standard for results-based project finance and is recognized internationally as the benchmark for quality and rigor in certifying environmental and socio-economic project outputs. Established in 2003 by WWF, the Gold Standard today is trusted and endorsed by NGOs, governments, and multinationals including United Nations agencies worldwide.

First Climate, our offsetting partner and project manager of the wind farm, has retired emission reduction certificates for 250 tons of greenhouse gases irrevocably from the market.

EBG Capital AG

EBG Capital AG is an agricultural investment advisory boutique with global reach and proven track record. We are providing specialist advice and access to attractive investment opportunities. Our clients include single family offices, wealth managers, institutional investors and international organizations.
